Announcement of New Orders

FUJI OOZX Inc. (Headquarters: Kikugawa City, Shizuoka, Japan; President: Satoshi Tsujimoto) is proceeding with the business structural reforms in the 2026 Mid-Term Management Plan built on the maintenance and expansion of existing businesses and the growth and expansion of new businesses, like the two wheels of a cart.

In existing businesses, we have been working on sales expansion activities to increase our global market share of engine valves as a response to the decrease in the number of internal combustion engines.

We are pleased to announce that our overseas subsidiary, FUJI OOZX MEXICO, S.A. DE C.V. (Head office: Guanajuato, Mexico; President: Junichi Fukuda), has received new orders for engine valves from Toyota Motor North America, Inc. and has started delivery in the North American market. In order to meet the great number of orders, we geared up not only to manufacture in FUJI OOZX MEXICO but also to review the allocation in our world-wide group production.

<Outline of new orders>

Products	: Exhaust engine valves
Delivery quantity	: Approx. 14 million valves per year
Start of delivery	: Delivery started after receipt of order in August 2024
